## PART 1 - GENERAL

### 1.1 THE SURVEYORS

The Seller has engaged the Surveyors to provide the Single Survey Report and a generic Mortgage Valuation Report for Lending Purposes. The Seller has also engaged the Surveyors to provide an Energy Report in the format prescribed by the accredited Energy Company.

The Surveyors are authorised to provide a transcript or retype of the generic Mortgage Valuation Report on to Lender specific pro-forma. Transcript reports are commonly requested by Brokers and Lenders. The transcript report will be in the format required by the Lender but will contain the same information, inspection date and valuation figure as the generic Mortgage Valuation Report and the Single Survey. The Surveyors will decline any transcript request which requires the provision of information additional to the information in the Report and the generic Mortgage Valuation Report until the Seller has conditionally accepted an offer to purchase made in writing.

Once the Seller has conditionally accepted an offer to purchase made in writing, the Purchaser's lender or conveyancer may request that the Surveyors provide general comment on standard appropriate supplementary documentation. In the event of a significant amount of documentation being provided to the Surveyors, an additional fee may be incurred by the Purchaser. Any additional fee will be agreed in writing.

If information is provided to the Surveyors during the conveyancing process which materially affects the valuation stated in the Report and generic Mortgage Valuation Report, the Surveyors reserve the right to reconsider the valuation. Where the Surveyors require to amend the valuation in consequence of such information, they will issue an amended Report and generic Mortgage Valuation Report to the Seller. It is the responsibility of the Seller to ensure that the amended Report and generic Mortgage Valuation Report are transmitted to every prospective Purchaser.

The individual Surveyor will be a member of the Royal Institution of Chartered Surveyors who is competent to survey, value and report upon Residential Property<sup>1</sup>.

If the Surveyors have had a previous business relationship within the past two years with the Seller or Seller's Agent or relative to the property, they will be obliged to indicate this by marking the adjacent box.

The Surveyors have a written complaints handling procedure. This is available from the offices of the Surveyors at the address stated.

### 1.2 THE REPORT

The Surveyors will not provide an amended Report on the Property, except to correct factual inaccuracies.

The Report will identify the nature and source of information relied upon in its preparation.

The Surveyor shall provide a Market Value of the Property, unless the condition of the Property is such that it would be inappropriate to do so. A final decision on whether a loan will be granted rests with the Lender who may impose retentions in line with their lending criteria. The date of condition and value of the property will be the date of inspection.

Prior to 1 December 2008, Purchasers have normally obtained their own report from their chosen Surveyor. By contrast, a Single Survey is instructed by the Seller and made available to all potential Purchasers in expectation that the successful Purchaser will have relied upon it. The Royal Institution of Chartered Surveyors rules require disclosure of any potential conflict of interest when acting for the Seller and the Purchaser in the same transaction. The Single Survey may give rise to a conflict of interest and if this is of concern to any party they are advised to seek their own independent advice.

The Report and any expressions or assessments in it are not intended as advice to the Seller or Purchaser or any other person in relation to an asking price or any other sales or marketing decisions.

<sup>1</sup> Which shall be in accordance with the current RICS Valuation Standards (The Red Book) and RICS Rules of Conduct.

The Report is based solely on the Property and is not to be relied upon in any manner whatsoever when considering the valuation or condition of any other property.

If certain minor matters are mentioned in the Report it should not be assumed that the Property is free of other minor defects.

Neither the whole nor any part of the Report may be published in any way, reproduced or distributed by any party other than the Seller, prospective purchasers and the Purchaser and their respective professional advisers without the prior written consent of the Surveyors.

## 1.3 LIABILITY

The Report is prepared with the skill and care reasonably to be expected of a competent residential surveyor who is a member of the Royal Institution of Chartered Surveyors.

The Report is addressed to the Seller and was prepared in the expectation that it (or a complete copy) along with these Terms and Conditions (or a complete copy) would (or, as the case might be, would have been) be disclosed and delivered to:

- the Seller;
- any person(s) noting an interest in purchasing the Property from the Seller;
- any person(s) who make(s) (or on whose behalf is made) an offer to purchase the Property, whether or not that offer is accepted by the Seller;
- the Purchaser; and
- the professional advisers of any of these.

The Surveyors acknowledge that their duty of skill and care in relation to the Report is owed to the Seller and to the Purchaser. The Surveyors accept no responsibility or liability whatsoever in relation to the Report to persons other than the Seller and the Purchaser. The Seller and Purchaser should be aware that if a Lender seeks to rely on this Report they do so at their own risk. In particular, the Surveyors accept no responsibility or liability whatsoever to any Lender in relation to the Report. Any such Lender relies upon the Report entirely at their own risk.

## 1.4 GENERIC MORTGAGE VALUATION REPORT

The Surveyors undertake to the Seller that they will prepare a generic Mortgage Valuation Report, which will be issued along with the Single Survey. It is the responsibility of the Seller to ensure that the generic Mortgage Valuation Report is provided to every potential Purchaser.

## 1.5 TRANSCRIPT MORTGAGE VALUATION FOR LENDING PURPOSES

The Surveyors undertake that on being asked to do so by a prospective purchaser, or his/her professional advisor or Lender, they will prepare a Transcript Mortgage Valuation Report for Lending Purposes on terms and conditions to be agreed between the Surveyors and Lender and solely for the use of the Lender and upon which the Lender may rely. The decision as to whether finance will be provided is entirely a matter for the Lender. The Transcript Mortgage Valuation Report will be prepared from information contained in the Report and the generic Mortgage Valuation Report<sup>2</sup>.

## 1.6 INTELLECTUAL PROPERTY

All intellectual property rights whatsoever (including copyright) in and to the Report, excluding the headings and rubrics, are the exclusive property of the Surveyors and shall remain their exclusive property unless

---

<sup>2</sup> Which shall be in accordance with the current RICS Valuation Standards (The Red Book) and RICS Rules of Conduct.

they assign the same to any other party in writing.

## 1.7 PAYMENT

The Surveyors are entitled to refrain from delivering the Report to anyone until the fee and other charges for it notified to the Seller have been paid. Additional fees will be charged for subsequent inspections and Reports.

## 1.8 CANCELLATION

The Seller will be entitled to cancel the inspection by notifying the Surveyor's office at any time before the day of the inspection.

The Surveyor will be entitled not to proceed with the inspection (and will so report promptly to the Seller) if after arriving at the property, the Surveyor concludes that it is of a type of construction of which the Surveyor has insufficient specialist knowledge to be able to provide the inspection satisfactorily. The Surveyor will also be entitled not to proceed if after arriving at the property, the surveyor concludes that the property is exempt under Part 3 of The Housing (Scotland) Act 2006 as detailed in the (Prescribed Documents) Regulations 2008. If there is a potential threat to their health or personal safety, the inspection may be postponed or cancelled, at the Surveyor's discretion.

In the case of cancellation or the inspection not proceeding, the Surveyor will refund any fees paid by the Seller for the inspection and Report, except for expenses reasonably incurred and any fee due in light of the final paragraph of this section.

In the case of cancellation by the Seller, for whatever reason, after the inspection has taken place but before a written report is issued, the Surveyor will be entitled to raise an invoice equivalent to 80% of the agreed fee.

## 1.9 PRECEDENCE

If there is any incompatibility between these Terms and Conditions and the Report, these Terms and Conditions take precedence.

## 1.10 DEFINITIONS

- the "Lender" is the party who has provided or intends or proposes to provide financial assistance to the Purchaser towards the purchase of the Property and in whose favour a standard security will be granted over the Property;
- the "Transcript Mortgage Valuation Report for Lending Purposes" means a separate report, prepared by the Surveyor, prepared from information in the Report and the generic Mortgage Valuation Report, but in a style and format required by the Lender. The Transcript Mortgage Valuation Report for Lending Purposes will be prepared with the skill and care reasonably to be expected from a surveyor who is a member of the Royal Institution of Chartered Surveyors and who is competent to survey, value and report on the Property;
- the "Generic Mortgage Valuation Report" means a separate report, prepared by the Surveyor from information in the Report but in the Surveyor's own format;
- the "Market Value" is the estimated amount for which a property should exchange on the date of valuation between a willing buyer and a willing seller in an arm's-length transaction after proper marketing wherein the parties had each acted knowledgeably, prudently and without compulsion;
- the "Property" is the property which forms the subject of the Report;
- the "Purchaser" is the person (or persons) who enters into a contract to buy the Property from the Seller;

- a "prospective Purchaser" is anyone considering buying the Property;
- the "Report" is the report, of the kind described in Part 2 of these Terms and Conditions and in the form set out in part 1 of Schedule 1 of the Housing (Scotland) Act 2006 (Prescribed Documents) Regulations 2008;
- the "Seller" is/are the proprietor(s) of the Property;
- the "Surveyor" is the author of the Report on the Property; and
- the "Surveyors" are the firm or company of which the Surveyor is an employee, director, member or partner (unless the Surveyor is not an employee, director, member or partner, when the "Surveyors" means the Surveyor) whose details are set out at the head of the Report.
- the "Energy Report" is the advice given by the accredited Energy Company, based on information collected by the Surveyor during the Inspection, and also includes an Energy Performance Certificate, in a Government approved format.

## PART 2 - DESCRIPTION OF THE REPORT

### 2.1 THE SERVICE

The Single Survey is a Report by an independent Surveyor, prepared in an objective way regarding the condition and value of the Property on the day of the inspection, and who is a member of the Royal Institution of Chartered Surveyors. It includes an Energy Report as required by Statute and this is in the format of the accredited Energy Company. In addition, the Surveyor has agreed to supply a generic Mortgage Valuation Report.

### 2.2 THE INSPECTION

The Inspection is a general surface examination of those parts of the Property which are accessible: in other words, *visible and readily available for examination from ground and floor levels, without risk of causing damage to the Property or injury to the Surveyor.*

All references to visual inspection refer to an inspection from within the property at floor level and from ground level within the site and adjoining public areas, without the need to move any obstructions. Any references to left or right are taken facing the front of the property.

The Inspection is carried out with the Seller's permission, without causing damage to the building or contents. Furniture, stored items and insulation are not moved.

Unless identified in the report the Surveyor will assume that no harmful or hazardous materials have been used in the construction. The presence or possible consequences of any site contamination will not be researched.

The Surveyor will not carry out an asbestos inspection, and will not be acting as an asbestos inspector in completing a Single Survey of properties that may fall within the Control of Asbestos in the Workplace Regulations. In the case of flats it will be assumed that there is a duty holder, as defined in the Regulations and that a Register of Asbestos and effective Management Plan is in place, which does not require any expenditure, or pose a significant risk to health. No enquiry of the duty holder will be made.

### 2.3 THE REPORT

The Report will be prepared by the Surveyor who carried out the property inspection and will describe various aspects of the property as defined by the headings of the Single Survey report with the comments

being general and unbiased. The report on the location, style and condition of the property, will be concise and will be restricted to matters that could have a material effect upon value and will omit items that, in the Surveyor's opinion, are not significant. If certain minor matters are mentioned, it should not be interpreted that the property is free of any other minor defects.

Throughout the Report, the following repair categories will be used to give an overall opinion of the state of repair and condition of the property.

- 1 Category 3: Urgent repairs or replacement are needed now. Failure to deal with them may cause problems to other parts of the property or cause a safety hazard. Estimates for repairs or replacement are needed now.
- 2 Category 2: Repairs or replacement requiring future attention, but estimates are still advised.
- 3 Category 1: No immediate action or repair is needed.

**WARNING:** If left unattended, even for a relatively short period, Category 2 repairs can rapidly develop into more serious Category 3 repairs. The existence of Category 2 or Category 3 repairs may have an adverse effect on marketability, value and the sale price ultimately achieved for the property. This is particularly true during slow market conditions when the effect can be considerable.

Parts of the property, which cannot be seen or accessed, will not be reported upon and this will be stated. If the Surveyor suspects that a defect may exist within an unexposed area and which could have a material effect upon the value, he may recommend further investigation by specialist contractors.

## 2.4 SERVICES

Surveyors are not equipped or qualified to test the services and therefore no comment can be interpreted as implying that the design, installation and function of the services are in accordance/compliance with regulations, safety and efficiency expectations. However, comment is made where there is cause to suspect significant defects or shortcomings with the installations. No tests are made of any services or appliances.

## 2.5 ACCESSIBILITY

A section is included to help identify the basic information interested parties need to know to decide whether to view a property.

## 2.6 ENERGY REPORT

A section is included that makes provision for an Energy Report, relative to the property. The Surveyor will collect physical data from the property and provide such data in a format required by an accredited Energy Company. The Surveyor cannot of course accept liability for any advice given by the Energy Company.

## 2.7 VALUATION AND CONVEYANCER ISSUES

The last section of the Report contains matters considered relevant to the Conveyancer (Solicitor). It also contains the Surveyor's opinion both of the market value of the property and of the re-instatement cost, as defined below.

"Market Value" *The estimated amount for which a property should exchange on the date of valuation between a willing buyer and a willing seller in an arm's-length transaction after proper marketing wherein the parties had each acted knowledgeably, prudently and without compulsion.* In arriving at the opinion of the Market Value the Surveyor also makes various standard assumptions covering, for example, vacant possession; tenure and other legal considerations; contamination and hazardous materials; the condition of un-inspected parts; the right to use mains services; and the exclusion of curtains, carpets etc. from the valuation. In the case of flats, the following further assumptions are made that:

- There are rights of access and exit over all communal roadways, corridors, stairways etc. and to use

# Terms and Conditions

communal grounds, parking areas, and other facilities;

- There are no particularly troublesome or unusual legal restrictions;
- There is no current dispute between the occupiers of the flats or any outstanding claims or losses; and the costs of repairs to the building are shared among the co-proprietors on an equitable basis.

Any additional assumption, or any found not to apply, is reported.

"Re-instatement cost" is an estimate for insurance purposes of the current cost of rebuilding the Property in its present form unless otherwise stated. This includes the cost of rebuilding the garage and permanent outbuildings, site clearance and professional fees, but excludes VAT (except on the fees).

Sellers or prospective Purchasers may consider it prudent to instruct a reinspection and revaluation after a period of 12 weeks (or sooner if appropriate) to reflect changing circumstances in the market and/or in the physical condition of the Property.

## 1. Information and scope of inspection

This section tells you about the type, accommodation, neighbourhood, age and construction of the property. It also tells you about the extent of the inspection and highlights anything that the surveyor could not inspect.

All references to visual inspection refer to an inspection from within the property without moving any obstructions and externally from ground level within the site and adjoining public areas. Any references to left or right in a description of the exterior of the property refer to the view of someone standing facing that part of the property from the outside.

The inspection is carried out without causing damage to the building or its contents and without endangering the occupiers or the surveyor. Heavy furniture, stored items and insulation are not moved. Unless identified in the report the surveyor will assume that no harmful or hazardous materials or techniques have been used in the construction. The presence or possible consequences of any site contamination will not be researched.

Services such as TV/cable connection, internet connection, swimming pools and other leisure facilities etc. will not be inspected or reported on.

<b>Description</b>	The subjects comprise a two storey end terraced house.
<b>Accommodation</b>	Ground floor - Entrance porch, hallway, lounge, kitchen, WC compartment and conservatory. First floor - Three bedrooms and shower room with WC.
<b>Gross internal floor area (m<sup>2</sup>)</b>	81m <sup>2</sup> approximately (excluding conservatory 16m <sup>2</sup> approximately).
<b>Neighbourhood and location</b>	The property is situated in a well established residential area with similar style and character properties surrounding. The property's location offers reasonable access to most normal local facilities.
<b>Age</b>	Built circa 1975.
<b>Weather</b>	Sunny.
<b>Chimney stacks</b>	None.

<p><b>Roofing including roof space</b></p>	<p><b>Sloping roofs were visually inspected with the aid of binoculars where appropriate.</b></p> <p><b>Roof spaces were visually inspected and were entered where there was safe and reasonable access, normally defined as being from a 3m ladder within the property.</b></p> <p><b>If this is not possible, then physical access to the roof space may be taken by other means if the Surveyor deems it safe and reasonable to do so.</b></p> <p>The roof structure is formed in prefabricated timber trusses overlaid with boarded sarking clad externally with concrete tiles.</p> <p>Access to the roof void area is gained via a hatch in the upper floor landing ceiling. Due to a lack of safe access and the presence of a considerable amount of stored items, only a very limited head and shoulders inspection could be undertaken from around the loft hatch.</p>
<p><b>Rainwater fittings</b></p>	<p><b>Visually inspected with the aid of binoculars where appropriate.</b></p> <p>The rainwater fittings are formed in PVC sections.</p>
<p><b>Main walls</b></p>	<p><b>Visually inspected with the aid of binoculars where appropriate.</b></p> <p><b>Foundations and concealed parts were not exposed or inspected.</b></p> <p>The property is of Crosswall construction having brick built gable walls with timber framed front and rear elevations clad with a rendered finish.</p>
<p><b>Windows, external doors and joinery</b></p>	<p><b>Internal and external doors were opened and closed where keys were available.</b></p> <p><b>Random windows were opened and closed where possible.</b></p> <p><b>Doors and windows were not forced open.</b></p> <p>The entrance doors are formed in PVC framed design. All windows are formed in PVC framed design housing double glazed units.</p> <p>Roof edges are formed in PVC sections.</p>

# Single Survey

<b>External decorations</b>	<b>Visually inspected.</b>  Painted and PVC finishes.
<b>Conservatories / porches</b>	<b>Visually inspected.</b>  A conservatory has been added to the rear of the property. This has a sub-structure formed in brickwork with the super-structure formed in PVC panels housing double glazed units under a pitched and polycarbonate sheeted roof covering.  A front entrance porch has also been added. This is formed in brickwork under a pitched roof structure clad with concrete tiles.
<b>Communal areas</b>	None so far as known.
<b>Garages and permanent outbuildings</b>	None.
<b>Outside areas and boundaries</b>	<b>Visually inspected.</b>  The property has garden grounds to both front and rear. These are a mix of hard and soft landscaping with the rear grounds generally enclosed by timber fencing.  The extent of boundaries is relatively well defined but should be confirmed by reference to the property Titles.
<b>Ceilings</b>	<b>Visually inspected from floor level.</b>  Presumed to be formed in plasterboard or similar type material.
<b>Internal walls</b>	<b>Visually inspected from floor level.</b>  <b>Using a moisture meter, walls were randomly tested for dampness where considered appropriate.</b>  Formed in stud partitions with plasterboard sheeting generally.

# Single Survey

<b>Floors including sub floors</b>	<p><b>Surfaces of exposed floors were visually inspected. No carpets or floor coverings were lifted.</b></p> <p><b>Physical access to the sub floor area may be taken if the Surveyor deems it is safe and reasonable to do so, and subject to a minimum clearance of 1m between the underside of floor joists and the solum as determined from the access hatch.</b></p> <p><b>Sub-floor areas were inspected only to the extent visible from a readily accessible and unfixed hatch by way of an inverted "head and shoulders" inspection at the access point.</b></p> <p>The floors are of suspended timber.</p> <p>All floor surfaces were covered at the time of inspection.</p>
<b>Internal joinery and kitchen fittings</b>	<p><b>Built-in cupboards were looked into but no stored items were moved.</b></p> <p><b>Kitchen units were visually inspected excluding appliances.</b></p> <p>The kitchen has both floor standing and wall mounted units. The internal pass doors and finishes are of timber design.</p>
<b>Chimney breasts and fireplaces</b>	None.
<b>Internal decorations</b>	<p><b>Visually inspected.</b></p> <p>Paper, painted and texture coated finishes have been used extensively throughout the property.</p>
<b>Cellars</b>	None.
<b>Electricity</b>	<p><b>Accessible parts of the wiring were visually inspected without removing fittings. No tests whatsoever were carried out to the system or appliances. Visual inspection does not assess any services to make sure they work properly and efficiently and meet modern standards. If any services are turned off, the surveyor will state that in the report and will not turn them on.</b></p> <p>Mains electrical supply. The electrical apparatus is situated in a cupboard accessed from the hall.</p> <p>It is noted that there are PV panels to both the front and rear roof slopes.</p>

# Single Survey

<b>Gas</b>	<p><b>Accessible parts of the system were visually inspected without removing fittings. No tests whatsoever were carried out to the system or appliances. Visual inspection does not assess any services to make sure they work properly and efficiently and meet modern standards. If any services are turned off, the surveyor will state that in the report and will not turn them on.</b></p> <p>Mains gas supply. The proprietary gas meter housing box is located in the under stair cupboard.</p>
<b>Water, plumbing, bathroom fittings</b>	<p><b>Visual inspection of the accessible pipework, water tanks, cylinders and fittings without removing any insulation.</b></p> <p><b>No tests whatsoever were carried out to the system or appliances.</b></p> <p>Mains water supply. The main sanitary ware comprises shower cubicle, wash hand basin and WC.</p>
<b>Heating and hot water</b>	<p><b>Visual inspection of the accessible pipework, water tanks, cylinders and fittings without removing any insulation.</b></p> <p><b>No tests whatsoever were carried out to the system or appliances.</b></p> <p>A gas fired central heating system is installed. The central heating boiler is situated in the cupboard accessed from the bathroom and is a Vokera Excel-1 30C type combination boiler.</p>
<b>Drainage</b>	<p><b>Drainage covers etc. were not lifted.</b></p> <p><b>Neither drains nor drainage systems were tested.</b></p> <p>Presumed to main sewer.</p>

<b>Fire, smoke and burglar alarms</b>	<p><b>Visually inspected.</b></p> <p><b>No tests whatsoever were carried out to the system or appliances.</b></p> <p>The property is believed to be fitted with interlinked alarms/detectors.</p> <p>Fire Safety Legislation effective from February 2022 requires a smoke alarm to be installed in the room most frequently used for living purposes and in every circulation space on each floor. A heat detecting alarm must be installed in every kitchen area and all smoke and heat alarms must be ceiling mounted and interlinked. Where there is a carbon-fuelled appliance e.g. central heating boiler, open fire, wood burning stove etc, a carbon monoxide detector is also required. The purchaser(s) should appraise themselves of the requirements of this legislation and engage with appropriately accredited contractors to ensure compliance.</p>
---------------------------------------	---

## Any additional limits to inspection

At the time of inspection the property was occupied, fully furnished with fitted floor coverings throughout. Inspection of the roof space was limited by the presence of insulation material. All unseen areas are assumed to be free from defect.

Floors have varying styles of covering. It was not possible to inspect areas of flooring beneath the baths, shower cubicles, WCs or similar water using appliances and accordingly no comment can be made on the condition of enclosed flooring.

Services have not been tested. To have these tested arrangements should be made with suitably qualified electricians, plumbers, heating engineers, etc.

Windows and external doors were not all fully opened or tested.

The construction materials described in this report should not be considered as an exact specification. They are described for general guide only and based on a non-disruptive, visual inspection.

Due to the nature and/or age of some properties, deleterious materials e.g. asbestos or Reinforced Autoclaved Aerated Concrete (RAAC) can be present in the building fabric and/or the finished surfaces to such e.g. hidden walls or roof sections, textured coatings such as Artex, floor/ceiling/wall tiles, claddings, linings etc. If any of these elements are applicable to the property under report and should you require certainty of the construction of any part of the property (including any outbuildings or garages) then a detailed Building Survey or sample testing of materials by qualified technicians/scientists would be required. This degree of reporting is clearly outside the scope of the Home Report.

This is not an Asbestos survey and should not be construed as such. Should an inspection to identify asbestos or other deleterious materials within the property e.g. Reinforced Autoclaved Aerated Concrete (RAAC) be required this should be provided by suitably qualified specialists under separate instructions.

An inspection for Japanese Knotweed was not carried out. This is a plant which is subject to control regulation, is considered to be invasive and one which can render a property unsuitable for some mortgage lenders. It is therefore assumed that there is no Japanese Knotweed within the boundaries of the property or its neighbouring property. Identification of Japanese Knotweed is best undertaken by a specialist contractor.

Adverse weather conditions can expose underlying defects to parts of the building fabric that are not apparent during good or dry conditions. This is particularly the case with roofs, including flashings and abutments, e.g. at extensions,

## Single Survey

	conservatories or with neighbouring property. A good building maintenance programme is essential with roof areas inspected/maintained regularly by reputable contractors and especially after inclement weather.
--	--

## Sectional Diagram showing elements of a typical house

Reference may be made in this report to some or all of the above component parts of the property. This diagram may assist you in locating and understanding these items.

# Single Survey

## 2. Condition

This section identifies problems and tells you about the urgency of any repairs by using one of the following three categories:

Category 3	Category 2	Category 1
Urgent repairs or replacement are needed now. Failure to deal with them may cause problems to other parts of the property or cause a safety hazard. Estimates for repairs or replacement are needed now.	Repairs or replacement requiring future attention, but estimates are still advised.	No immediate action or repair is needed.

 Structural movement	
Repair category	1
Notes	No evidence of any recent settlement, subsidence or significant structural movement having affected the building.

 Dampness, rot and infestation	
Repair category	1
Notes	There was no evidence of dampness, rot or infestation noted within those areas available for inspection.

 Chimney stacks	
Repair category	N/A
Notes	Not applicable.

 Roofing including roof space	
Repair category	2
Notes	<p>The roof tiles are believed to be the original specification displaying general weathering effects commensurate with age and exposure.</p> <p>Within the roof void area the effects of condensation noted to the sarking boards, this is indicative of lack of sufficient ventilation.</p>

# Single Survey

 Rainwater fittings	
Repair category	1
Notes	<p>No significant visible defects noted.</p> <p>It should be appreciated it was not raining at time of inspection and we are therefore unable to confirm that all rainwater good joints are watertight. It is widely recommended that monitoring of rainwater goods be undertaken particularly in periods of heavy rainfall.</p>

 Main walls	
Repair category	1
Notes	<p>No significant visible defects noted.</p> <p>The sub-floor ventilators have been blocked at the front elevation and are obscured at the rear elevation. It is considered good practice to have these cleared to allow airflow to the sub-floor areas.</p>

 Windows, external doors and joinery	
Repair category	1
Notes	<p>No significant visible defects noted.</p> <p>Double glazing, can be problematic and over time the operation of the windows can be affected and opening mechanisms damaged. In addition, seals to double glazed units are prone to unexpected failure. It is therefore likely that maintenance repairs will be required as part of an ongoing maintenance programme.</p>

 External decorations	
Repair category	1
Notes	No significant visible defects noted.

 Conservatories/porches	
Repair category	1
Notes	No significant visible defects noted.

# Single Survey

## Communal areas

<b>Repair category</b>	N/A
<b>Notes</b>	Not applicable.

## Garages and permanent outbuildings

<b>Repair category</b>	N/A
<b>Notes</b>	Not applicable.

## Outside areas and boundaries

<b>Repair category</b>	1
<b>Notes</b>	No significant visible defects noted.  It is noted that outwith the property boundaries there is an electrical sub-station.

## Ceilings

<b>Repair category</b>	1
<b>Notes</b>	No significant visible defects noted.

## Internal walls

<b>Repair category</b>	1
<b>Notes</b>	No significant visible defects noted.

## Floors including sub-floors

<b>Repair category</b>	1
<b>Notes</b>	No significant visible defects noted.

## Internal joinery and kitchen fittings

<b>Repair category</b>	1
<b>Notes</b>	No significant visible defects noted.

# Single Survey

## Chimney breasts and fireplaces

Repair category	N/A
Notes	Not applicable.

## Internal decorations

Repair category	1
Notes	It is noted that some of the ceilings have an artex/textured coated finish. It is known from information widely available that some forms of artex may contain traces of asbestos and that specialist advice should be sought if disturbance of the finish is planned.

## Cellars

Repair category	N/A
Notes	Not applicable.

## Electricity

Repair category	1
Notes	<p>No significant visible defects noted.</p> <p>It is assumed that building regulation approval has been obtained for any electrical alteration or installation carried out after 1 January 2005.</p> <p>The Institution of Engineering and Technology (IET) recommends that inspections and testings are undertaken at least every five years and on a change of occupancy for tenanted property or every ten years or change of ownership for owner occupied properties. It should be appreciated that only the most recently constructed or re-wired properties will have installations which fully comply with IET regulations and codes of practice.</p>

## Gas

Repair category	1
Notes	<p>No significant visible defects noted.</p> <p>In the interests of safety and to meet current regulations, all gas appliances, pipework and fittings should be checked by a registered 'Gas Safe' engineer with any repairs or replacements recommended by the engineer carried out immediately.</p>

# Single Survey

## Water, plumbing and bathroom fittings

<b>Repair category</b>	1
<b>Notes</b>	No significant visible defects noted.

## Heating and hot water

<b>Repair category</b>	1
<b>Notes</b>	No significant visible defects noted.  Gas central heating systems should be maintained on an annual basis by a Gas Safe registered engineer.

## Drainage

<b>Repair category</b>	1
<b>Notes</b>	No significant visible defects noted.

Heating and hot water	1
Drainage	1

## Category 3

Urgent repairs or replacement are needed now. Failure to deal with them may cause problems to other parts of the property or cause a safety hazard. Estimates for repairs or replacement are needed now.

## Category 2

Repairs or replacement requiring future attention, but estimates are still advised.

## Category 1

No immediate action or repair is needed.

### Remember

The cost of repairs may influence the amount someone is prepared to pay for the property. We recommend that relevant estimates and reports are obtained in your own name.

### Warning

If left unattended, even for a relatively short period, Category 2 repairs can rapidly develop into more serious Category 3 repairs. The existence of Category 2 or Category 3 repairs may have an adverse effect on marketability, value and the sale price ultimately achieved for the property. This is particularly true during slow market conditions where the effect can be considerable.

## 3. Accessibility information

### Guidance notes on accessibility information

*Three steps or fewer to a main entrance door of the property:*

In flatted developments the 'main entrance' would be the flat's own entrance door, not the external door to the communal stair. The 'three steps or fewer' are counted from external ground level to the flat's entrance door. Where a lift is present, the count is based on the number of steps climbed when using the lift.

*Unrestricted parking within 25 metres:*

For this purpose, 'Unrestricted parking' includes parking available by means of a parking permit. Restricted parking includes parking that is subject to parking restrictions, as indicated by the presence of solid yellow, red or white lines at the edge of the road or by a parking control sign, parking meters or other coin-operated machines.

1. Which floor(s) is the living accommodation on?	Ground			
2. Are there three steps or fewer to a main entrance door of the property?	Yes	<input checked="" type="checkbox"/>	No	<input type="checkbox"/>
3. Is there a lift to the main entrance door of the property?	Yes	<input type="checkbox"/>	No	<input checked="" type="checkbox"/>
4. Are all door openings greater than 750mm?	Yes	<input type="checkbox"/>	No	<input checked="" type="checkbox"/>
5. Is there a toilet on the same level as the living room and kitchen?	Yes	<input checked="" type="checkbox"/>	No	<input type="checkbox"/>
6. Is there a toilet on the same level as a bedroom?	Yes	<input checked="" type="checkbox"/>	No	<input type="checkbox"/>
7. Are all rooms on the same level with no internal steps or stairs?	Yes	<input type="checkbox"/>	No	<input checked="" type="checkbox"/>
8. Is there unrestricted parking within 25 metres of an entrance door to the building?	Yes	<input checked="" type="checkbox"/>	No	<input type="checkbox"/>

## 4. Valuation and conveyancer issues

This section highlights information that should be checked with a solicitor or licensed conveyancer. It also gives an opinion of market value and an estimated reinstatement cost for insurance purposes.

### Matters for a solicitor or licensed conveyancer

In addition to the usual legal checks and searches, it should be ensured that Juniper Avenue is a highway maintainable at public expense.

Alterations have taken place in the past with the creation of a front entrance porch, conservatory and WC compartment. It is assumed that any necessary Local Authority consents have been both sought and complied with in respect of the alterations undertaken.

Unless stated otherwise within this report and in the absence of any information to the contrary, we have assumed that:

All buildings have been erected either prior to planning control, or in accordance with planning permissions, and have the benefit of permanent planning consents or existing use rights for their current use;

The property is not adversely affected by town planning or road proposals;

All alterations, additions or extensions to the property have received all necessary Town Planning Consents, Building Authority Approvals (Building Warrants) and Completion Certificates;

The property complies with all relevant statutory and local authority requirements, including but not limited to Fire Regulations, The Equality Act, The Control of Asbestos Act, Health and Safety Regulations, Environmental Health Regulations, Regulations governing Residential Tenancies and similar.

### Estimated reinstatement cost for insurance purposes

The property should be insured on a reinstatement basis for not less than £235,000 (TWO HUNDRED AND THIRTY FIVE THOUSAND POUNDS).

This is an indicative figure only, based on the current Building Cost Information Service (BCIS) published rates. It is good practice to regularly review this figure as building costs can increase rapidly. Specific specialist advice should be obtained from the building insurers where necessary.

### Valuation and market comments

The market value of the property, at the present time, may be fairly stated in the sum of £155,000 (ONE HUNDRED AND FIFTY FIVE THOUSAND POUNDS).

# Single Survey

The housing market has been buoyant since reopening after the Covid19 pandemic with demand levels often exceeding supply, resulting in some record sales levels. However, there is currently a degree of economic uncertainty, with rising costs and it is prudent to keep the valuation under constant review.

# Mortgage Valuation Report

## Property Address

Address 98 Juniper Avenue, East Kilbride, Glasgow, G75 9JS  
Seller's Name Denise Dickson  
Date of Inspection 04/04/2025

## Property Details

Property Type  House  Bungalow  Purpose built maisonette  Converted maisonette  
 Purpose built flat  Converted flat  Tenement flat  Flat over non-residential use  
 Other (specify in General Remarks)

Property Style  Detached  Semi detached  Mid terrace  End terrace  
 Back to back  High rise block  Low rise block  Other (specify in General Remarks)

Does the surveyor believe that the property was built for the public sector, e. g. local authority, military, police?  Yes  No

Flats/Maisonettes only Floor(s) on which located  No. of floors in block  Lift provided?  Yes  No  
No. of units in block

Approximate Year of Construction

## Tenure

Absolute Ownership  Other

## Accommodation

Number of Rooms  Living room(s)  Bedroom(s)  Kitchen(s)  
 Bathroom(s)  WC(s)  Other (Specify in General remarks)

Gross Floor Area (excluding garages and outbuildings)  m<sup>2</sup> (Internal)  m<sup>2</sup> (External)

Residential Element (greater than 40%)  Yes  No

## Garage / Parking / Outbuildings

Single garage  Double garage  Parking space  No garage / garage space / parking space

Available on site?  Yes  No

### Permanent outbuildings:

No permanent outbuildings.

# Mortgage Valuation Report

## Construction

Walls  Brick  Stone  Concrete  Timber frame  Other (specify in General Remarks)  
Roof  Tile  Slate  Asphalt  Felt  Other (specify in General Remarks)

## Special Risks

Has the property suffered structural movement?  Yes  No

If Yes, is this recent or progressive?  Yes  No

Is there evidence, history, or reason to anticipate subsidence, heave, landslip or flood in the immediate vicinity?  Yes  No

If Yes to any of the above, provide details in General Remarks.

## Service Connections

Based on visual inspection only. If any services appear to be non-mains, please comment on the type and location of the supply in General Remarks

Drainage  Mains  Private  None      Water  Mains  Private  None  
Electricity  Mains  Private  None      Gas  Mains  Private  None  
Central Heating  Yes  Partial  None

Brief description of Central Heating and any non mains services:

Gas fired boiler to radiator system.

## Site

Apparent legal issues to be verified by the conveyancer. Please provide a brief description in General Remarks.

Rights of way  Shared drives / access  Garage or other amenities on separate site  Shared service connections  
 Ill-defined boundaries  Agricultural land included with property  Other (specify in General Remarks)

## Location

Residential suburb  Residential within town / city  Mixed residential / commercial  Shared service connections  
 Commuter village  Remote village  Isolated rural property  Other (specify in General Remarks)

## Planning Issues

Has the property been extended / converted / altered?  Yes  No

If Yes provide details in General Remarks.

## Roads

Made up road  Unmade road  Partly completed new road  Pedestrian access only  Adopted  Unadopted

# Mortgage Valuation Report

## General Remarks

The property is a Crosswall type construction with brick built gable walls and the front and rear elevations formed in timber frame with a render finish.

The property is situated in an East Kilbride Development Corporation built housing area with similar style and character properties surrounding. The property's location offers reasonable access to most normal local facilities.

At the time of inspection the property was noted to be generally in a condition commensurate with age and character however items of repair, maintenance and upgrading are required.

The foregoing comments on the overall condition of the property have been reflected in providing our opinion of value.

## Essential Repairs

None required for normal mortgage lending purposes.

Estimated cost of essential repairs

Retention recommended?  Yes  No

Retention amount

## Comment on Mortgageability

Subject to individual lender's criteria the subjects should afford adequate security for mortgage lending purposes at our opinion of value.

## Valuation

Market value in present condition £

Market value on completion of essential repairs £

Insurance reinstatement value £

(to include the cost of total rebuilding, site clearance, professional fees, ancillary charges plus VAT)

Is a reinspection necessary?  Yes  No

**Energy  
Performance  
Certificate**

# Energy Performance Certificate (EPC)

# Scotland

Dwellings

98 JUNIPER AVENUE, EAST KILBRIDE, GLASGOW, G75 9JS

**Dwelling type:** End-terrace house  
**Date of assessment:** 04 April 2025  
**Date of certificate:** 07 April 2025  
**Total floor area:** 79 m<sup>2</sup>  
**Primary Energy Indicator:** 182 kWh/m<sup>2</sup>/year

**Reference number:** 6615-1724-7000-0184-4202  
**Type of assessment:** RdSAP, existing dwelling  
**Approved Organisation:** Elmhurst  
**Main heating and fuel:** Boiler and radiators, mains gas

## You can use this document to:

- Compare current ratings of properties to see which are more energy efficient and environmentally friendly
- Find out how to save energy and money and also reduce CO<sub>2</sub> emissions by improving your home

<b>Estimated energy costs for your home for 3 years*</b>	<b>£3,660</b>	See your recommendations report for more information
<b>Over 3 years you could save*</b>	<b>£372</b>	

\* based upon the cost of energy for heating, hot water, lighting and ventilation, calculated using standard assumptions

## Energy Efficiency Rating

This graph shows the current efficiency of your home, taking into account both energy efficiency and fuel costs. The higher this rating, the lower your fuel bills are likely to be.

Your current rating is **band B (84)**. The average rating for EPCs in Scotland is **band D (61)**.

The potential rating shows the effect of undertaking all of the improvement measures listed within your recommendations report.

## Environmental Impact (CO<sub>2</sub>) Rating

This graph shows the effect of your home on the environment in terms of carbon dioxide (CO<sub>2</sub>) emissions. The higher the rating, the less impact it has on the environment.

Your current rating is **band C (79)**. The average rating for EPCs in Scotland is **band D (59)**.

The potential rating shows the effect of undertaking all of the improvement measures listed within your recommendations report.

## Top actions you can take to save money and make your home more efficient

Recommended measures	Indicative cost	Typical savings over 3 years
1 Floor insulation (suspended floor)	£800 - £1,200	£249.00
2 Solar water heating	£4,000 - £6,000	£123.00

A full list of recommended improvement measures for your home, together with more information on potential cost and savings and advice to help you carry out improvements can be found in your recommendations report.

To find out more about the recommended measures and other actions you could take today to stop wasting energy and money, visit [greenerscotland.org](http://greenerscotland.org) or contact Home Energy Scotland on 0808 808 2282.

**THIS PAGE IS THE ENERGY PERFORMANCE CERTIFICATE WHICH MUST BE AFFIXED TO THE DWELLING AND NOT BE REMOVED UNLESS IT IS REPLACED WITH AN UPDATED CERTIFICATE**

## Summary of the energy performance related features of this home

This table sets out the results of the survey which lists the current energy-related features of this home. Each element is assessed by the national calculation methodology; 1 star = very poor (least efficient), 2 stars = poor, 3 stars = average, 4 stars = good and 5 stars = very good (most efficient). The assessment does not take into consideration the condition of an element and how well it is working. 'Assumed' means that the insulation could not be inspected and an assumption has been made in the methodology, based on age and type of construction.

Element	Description	Energy Efficiency	Environmental
Walls	System built, as built, no insulation (assumed)	★☆☆☆☆	★☆☆☆☆
Roof	Pitched, 300 mm loft insulation	★★★★★	★★★★★
Floor	Suspended, no insulation (assumed)	—	—
Windows	Fully double glazed	★★★★☆	★★★★☆
Main heating	Boiler and radiators, mains gas	★★★★☆	★★★★☆
Main heating controls	Programmer, room thermostat and TRVs	★★★★☆	★★★★☆
Secondary heating	None	—	—
Hot water	From main system	★★★★☆	★★★★☆
Lighting	Low energy lighting in 82% of fixed outlets	★★★★★	★★★★★

## The energy efficiency rating of your home

Your Energy Efficiency Rating is calculated using the standard UK methodology, RdSAP. This calculates energy used for heating, hot water, lighting and ventilation and then applies fuel costs to that energy use to give an overall rating for your home. The rating is given on a scale of 1 to 100. Other than the cost of fuel for electrical appliances and for cooking, a building with a rating of 100 would cost almost nothing to run.

As we all use our homes in different ways, the energy rating is calculated using standard occupancy assumptions which may be different from the way you use it. The rating also uses national weather information to allow comparison between buildings in different parts of Scotland. However, to make information more relevant to your home, local weather data is used to calculate your energy use, CO<sub>2</sub> emissions, running costs and the savings possible from making improvements.

## The impact of your home on the environment

One of the biggest contributors to global warming is carbon dioxide. The energy we use for heating, lighting and power in our homes produces over a quarter of the UK's carbon dioxide emissions. Different fuels produce different amounts of carbon dioxide for every kilowatt hour (kWh) of energy used. The Environmental Impact Rating of your home is calculated by applying these 'carbon factors' for the fuels you use to your overall energy use.

The calculated emissions for your home are 33 kg CO<sub>2</sub>/m<sup>2</sup>/yr.

The average Scottish household produces about 6 tonnes of carbon dioxide every year. Based on this assessment, heating and lighting this home currently produces approximately 2.6 tonnes of carbon dioxide every year. Adopting recommendations in this report can reduce emissions and protect the environment. If you were to install all of these recommendations this could reduce emissions by 0.5 tonnes per year. You could reduce emissions even more by switching to renewable energy sources.

### Estimated energy costs for this home

	Current energy costs	Potential energy costs	Potential future savings
Heating	£3,036 over 3 years	£2,787 over 3 years	
Hot water	£330 over 3 years	£207 over 3 years	
Lighting	£294 over 3 years	£294 over 3 years	
<b>Totals</b>	<b>£3,660</b>	<b>£3,288</b>	

These figures show how much the average household would spend in this property for heating, lighting and hot water. This excludes energy use for running appliances such as TVs, computers and cookers, and the benefits of any electricity generated by this home (for example, from photovoltaic panels). The potential savings in energy costs show the effect of undertaking all of the recommended measures listed below.

### Recommendations for improvement

The measures below will improve the energy and environmental performance of this dwelling. The performance ratings after improvements listed below are cumulative; that is, they assume the improvements have been installed in the order that they appear in the table. Further information about the recommended measures and other simple actions to take today to save money is available from the Home Energy Scotland hotline which can be contacted on 0808 808 2282. Before carrying out work, make sure that the appropriate permissions are obtained, where necessary. This may include permission from a landlord (if you are a tenant) or the need to get a Building Warrant for certain types of work.

Recommended measures	Indicative cost	Typical saving per year	Rating after improvement	
			Energy	Environment
1 Floor insulation (suspended floor)	£800 - £1,200	£83		
2 Solar water heating	£4,000 - £6,000	£41		

#### Alternative measures

There are alternative improvement measures which you could also consider for your home. It would be advisable to seek further advice and illustration of the benefits and costs of such measures.

- Cavity, internal or external wall insulation

### Choosing the right improvement package

For free and impartial advice on choosing suitable measures for your property, contact the Home Energy Scotland hotline on 0808 808 2282 or go to [www.greenerscotland.org](http://www.greenerscotland.org).

## About the recommended measures to improve your home's performance rating

This section offers additional information and advice on the recommended improvement measures for your home

### 1 Floor insulation (suspended floor)

Insulation of a floor will significantly reduce heat loss; this will improve levels of comfort, reduce energy use and lower fuel bills. Suspended floors can often be insulated from below but must have adequate ventilation to prevent dampness; seek advice about this if unsure. Further information about floor insulation is available from many sources including [www.energysavingtrust.org.uk/scotland/Insulation/Floor-insulation](http://www.energysavingtrust.org.uk/scotland/Insulation/Floor-insulation). Building regulations generally apply to this work so it is best to check with your local authority building standards department.

### 2 Solar water heating

A solar water heating panel, usually fixed to the roof, uses the sun to pre-heat the hot water supply. This can significantly reduce the demand on the heating system to provide hot water and hence save fuel and money. Planning permission might be required, building regulations generally apply to this work and a building warrant may be required, so it is best to check these with your local authority. You could be eligible for Renewable Heat Incentive payments which could appreciably increase the savings beyond those shown on your EPC, provided that both the product and the installer are certified by the Microgeneration Certification Scheme (or equivalent). Details of local MCS installers are available at [www.microgenerationcertification.org](http://www.microgenerationcertification.org).

## Low and zero carbon energy sources

Low and zero carbon (LZC) energy sources are sources of energy that release either very little or no carbon dioxide into the atmosphere when they are used. Installing these sources may help reduce energy bills as well as cutting carbon.

### LZC energy sources present:

- Solar photovoltaics

## Your home's heat demand

In this section, you can see how much energy you might need to heat your home and provide hot water. These are estimates showing how an average household uses energy. These estimates may not reflect your actual energy use, which could be higher or lower. You might spend more money on heating and hot water if your house is less energy efficient. The table below shows the potential benefit of having your loft and walls insulated. Visit <https://energysavingtrust.org.uk/energy-at-home> for more information.

Heat demand	Existing dwelling	Impact of loft insulation	Impact of cavity wall insulation	Impact of solid wall insulation
Space heating (kWh per year)	13,485	N/A	N/A	N/A
Water heating (kWh per year)	1,690			

## Addendum

This dwelling is a system built property or some of its walls are of non-conventional construction and requires further investigation to establish the type of construction, the type of wall insulation best suited (cavity insulation or internal/external insulation) and the savings it might deliver. Please contact the Home Energy Scotland hotline on 0808 808 2282 to find out more.

## About this document

This Recommendations Report and the accompanying Energy Performance Certificate are valid for a maximum of ten years. These documents cease to be valid where superseded by a more recent assessment of the same building carried out by a member of an Approved Organisation.

The Energy Performance Certificate and this Recommendations Report for this building were produced following an energy assessment undertaken by an assessor accredited by Elmhurst ([www.elmhurstenergy.co.uk](http://www.elmhurstenergy.co.uk)), an Approved Organisation Appointed by Scottish Ministers. The certificate has been produced under the Energy Performance of Buildings (Scotland) Regulations 2008 from data lodged to the Scottish EPC register. You can verify the validity of this document by visiting [www.scottishepcregister.org.uk](http://www.scottishepcregister.org.uk) and entering the report reference number (RRN) printed at the top of this page.

Assessor's name:	Mr. Gordon Turner
Assessor membership number:	EES/008495
Company name/trading name:	Shepherd Whyte & Barrie
Address:	Suites 7-8 Waverley House Caird Park Lanarkshire Hamilton ML3 0QA
Phone number:	01698891400
Email address:	<a href="mailto:andrew.macfarlane@wbcs.co.uk">andrew.macfarlane@wbcs.co.uk</a>
Related party disclosure:	No related party

If you have any concerns regarding the content of this report or the service provided by your assessor you should in the first instance raise these matters with your assessor and with the Approved Organisation to which they belong. All Approved Organisations are required to publish their complaints and disciplinary procedures and details can be found online at the web address given above.

## Use of this energy performance information

Once lodged by your EPC assessor, this Energy Performance Certificate and Recommendations Report are available to view online at [www.scottishepcregister.org.uk](http://www.scottishepcregister.org.uk), with the facility to search for any single record by entering the property address. This gives everyone access to any current, valid EPC except where a property has a Green Deal Plan, in which case the report reference number (RRN) must first be provided. The energy performance data in these documents, together with other building information gathered during the assessment is held on the Scottish EPC Register and is available to authorised recipients, including organisations delivering energy efficiency and carbon reduction initiatives on behalf of the Scottish and UK governments. A range of data from all assessments undertaken in Scotland is also published periodically by the Scottish Government. Further information on these matters and on Energy Performance Certificates in general, can be found at [www.gov.scot/epc](http://www.gov.scot/epc).

A Green Deal Plan has paid to install energy efficiency improvements at this property. If you become responsible for paying the electricity bill, you will be required to pay the Green Deal charge set out below. Also, you must comply with the terms and conditions in the Green Deal Plan. You should ask for a copy of the up to date Green Deal Plan from the owner of the property or the landlord and familiarise yourself with the contents.

The Green Deal Plan can be paid off early, although charges may apply. The Green Deal Plan is an unsecured loan, which is regulated by the Consumer Credit Act 1974. It is designed to save you at least as much money as you will have to repay. However, the actual level of your savings will depend on how much energy you use (e.g. to heat your property) and the future cost of energy.

**Current charge amount:** £0.86 per day  
**Payment period start:** 28/10/2014  
**Payment period end:** 24/06/2037  
**Interest rate payable:** fixed at 8.24% APR

This is the current charge amount but there can be subsequent charging periods with different charge amounts depending on the detail of the Plan

Plan charges:

- are payable as part of the electricity bill.
- reduce as each improvement is paid-off.

**GD Plan number:** AC0000032092  
**Green Deal Provider:** Home Energy and Lifestyle Management Limited  
Tel: 0141 248 8339  
Email: kenneth.lemay@btinternet.com  
This EPC can only be used to disclose the Green Deal Plan until 7 Apr 2026. From 8 Apr 2026 a further version should be retrieved from [www.scottishepcregister.org.uk](http://www.scottishepcregister.org.uk) using the EPC Report Reference Number (RRN above)

**Improvements installed**

**Paid-off in**

Solar photovoltaic panels (3.5 kWp, orientation S)

March 2037

**Estimates of how these improvements could reduce annual energy bills for a typical user**

Total: £339 p.a. Gas: £0 p.a. Electricity: £339 p.a. Other: £0 p.a.

Most improvements reduce the energy used for heating. These estimates are based on:

- the original Green Deal assessment;
- the improvements installed by this Plan (opposite);
- typical energy use for this type of property, using current energy prices.

**If you are a low user of energy you may not achieve these estimated savings.**

**Other important information**

**This Green Deal Plan is regulated by the Consumer Credit Act 1974.** This provides certain protections to those paying the Plan instalments through their electricity bill.

The improvements listed above were installed under this Green Deal Plan and are due to be paid off at the times specified. If an improvement listed above has not been paid off, you should check that:

- it is still in place;
- no alterations have been made to this property that would reduce its effectiveness;
- it has been maintained in line with guidance from the Green Deal Provider.

If, after taking-on this property, you are considering or carrying out renovations that may impact on the improvements installed under this plan, or you notice that such changes have already been made, you must contact your Green Deal Provider.

Mandatory product guarantees are supplied for at least five years. These may be subject to maintenance or servicing requirements and you should check these have been met.

Charges may apply if you decide to repay this Green Deal Plan early and these details are set out in the Plan.

If you take on this property, you may have to repay this Plan early if you want to demolish this property or permanently disconnect the electricity supply – contact your Green Deal Provider for further details.

New bill payers are advised to contact their energy supplier when they take on a Green Deal property, particularly if the property has a pre-payment meter.

**Further information can be found on the Green Deal Plan, a copy of which can be obtained from the owner of the property, or from the Green Deal Provider with the owner's consent.**

## Note for sellers

- Please complete this form carefully. It is important that your answers are correct.
- The information in your answers will help ensure that the sale of your house goes smoothly. Please answer each question with as much detailed information as you can.
- If anything changes after you fill in this questionnaire but before the date of entry for the sale of your house, tell your solicitor or estate agent immediately.

## Information to be given to prospective buyer(s)

1.	<b>Length of ownership</b>	
	How long have you owned the property?	1995
2.	<b>Council tax</b>	
	Which Council Tax band is your property in?	B
3.	<b>Parking</b>	
	What are the arrangements for parking at your property? (Please tick all that apply)	
	• Garage	<input type="checkbox"/> No
	• Allocated parking space	<input type="checkbox"/> No
	• Driveway	<input type="checkbox"/> No
	• Shared parking	<input type="checkbox"/> No
	• On street	<input type="checkbox"/> Yes
	• Resident permit	<input type="checkbox"/> No
	• Metered Parking	<input type="checkbox"/> No
	• Other (please specify):	<input type="text"/>
4.	<b>Conservation area</b>	
	Is your property in a designated Conservation Area (that is an area of special architectural or historical interest, the character or appearance of which it is desirable to preserve or enhance)?	No

# property questionnaire

<b>5.</b>	<b>Listed buildings</b>	
	<b>Is your property a Listed Building, or contained within one (that is a building recognised and approved as being of special architectural or historical interest)?</b>	<b>No</b>
<b>6.</b>	<b>Alterations/additions/extensions</b>	
<b>a.</b>	<p><b>(i) During your time in the property, have you carried out any structural alterations, additions or extensions (for example, provision of an extra bath/shower room, toilet, or bedroom)?</b></p> <p><b><u>If you have answered yes</u>, please describe below the changes which you have made:</b></p> <p>Porch and conservatory, downstairs toilet and removed livingroom wall to extend livingroom, moved back door and replaced with windows</p>	<b>Yes</b>
	<p><b>(ii) Did you obtain planning permission, building warrant, completion certificate and other consents for this work?</b></p> <p><b><u>If you have answered yes</u>, the relevant documents will be needed by the purchaser and you should give them to your solicitor as soon as possible for checking.</b></p> <p><b>If you do not have the documents yourself, please note below who has these documents and your solicitor or estate agent will arrange to obtain them:</b></p>	<b>Yes</b>
<b>b.</b>	<p><b>Have you had replacement windows, doors, patio doors or double glazing installed in your property?</b></p> <p><b><u>If you have answered yes</u>, please answer the three questions below:</b></p>	<b>Yes</b>
	<b>(i) Were the replacements the same shape and type as the ones you replaced?</b>	<b>No</b>
	<b>(ii) Did this work involve any changes to the window or door openings?</b>	<b>Yes</b>
	<p><b>(iii) Please describe the changes made to the windows doors, or patio doors (with approximate dates when the work was completed):</b></p> <p><b>Please give any guarantees which you received for this work to your solicitor or estate agent.</b></p> <p>Moved the back door and replaced them with windows, added on a conservatory which allows access to the back garden, 2007</p>	
<b>7.</b>	<b>Central heating</b>	
<b>a.</b>	<p><b>Is there a central heating system in your property?</b>  <b>(Note: a partial central heating system is one which does not heat all the main rooms of the property — the main living room, the bedroom(s), the hall and the bathroom).</b></p>	<b>Yes</b>

# property questionnaire

	<p><b><u>If you have answered yes or partial</u> – what kind of central heating is there? (Examples: gas-fired, solid fuel, electric storage heating, gas warm air).</b></p> <p>Combi boiler</p> <p><b><u>If you have answered yes</u>, please answer the three questions below:</b></p>		
	<p><b>i) When was your central heating system or partial central heating system installed?</b></p> <p>2024</p>		
	<p><b>(ii) Do you have a maintenance contract for the central heating system?</b></p> <p><b><u>If you have answered yes</u>, please give details of the company with which you have a maintenance contract:</b></p> <p>D&amp;G boiler care</p>	Yes	
	<p><b>(iii) When was your maintenance agreement last renewed? (Please provide the month and year).</b></p> <p>2024</p>		
<b>8.</b>	<b>Energy Performance Certificate</b>		
	<p><b>Does your property have an Energy Performance Certificate which is less than 10 years old?</b></p>	Yes	
<b>9.</b>	<b>Issues that may have affected your property</b>
